

Department of Chemistry

Summary

As a part of the Ray P. Authement College of Sciences, the UL Lafayette Department of Chemistry offers B.S. degrees in chemistry following three tracks: a track with American Chemical Society (ACS) certification, a non-certified track, and a pre-pharmacy track. In addition, the program offers minors in chemistry and forensics. As of Fall 2020, the Department of Chemistry employs ten tenured/tenure-track faculty, one instructor, four full time temporary emergency instructors, two adjunct faculty, and three staff members.

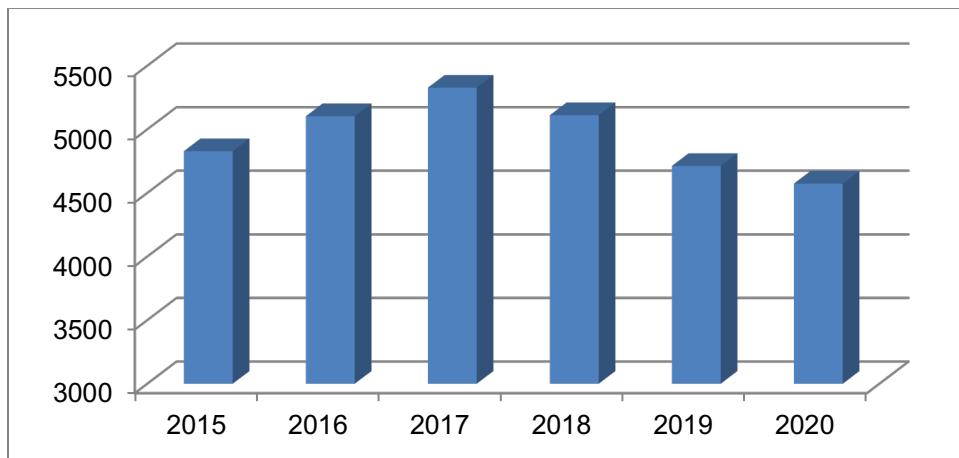

Enrollments

Enrollment figures for students majoring in chemistry are shown below:

* UL's posted pivot tables have not been updated to include Fall '20 data.

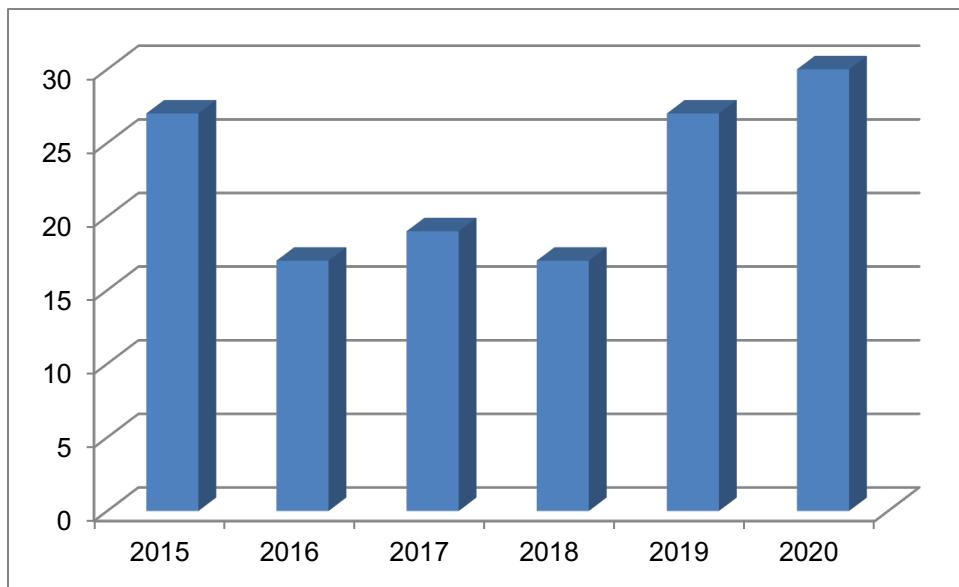

Department of Chemistry currently is home to the largest undergraduate chemistry program in our state. On average, we graduate 15-20 chemistry majors per year. In addition, we have a very large undergraduate service commitment. Annual enrollments in departmental course offerings peaked in 2017 at 5,327 students and declined to 4,573 students for 2020 (Spring '20: 2,144; Summer: 245; Fall: 2,184). These most recent figures are not necessarily representative due to the Covid-19 pandemic.

Peer-Reviewed Journal Publications

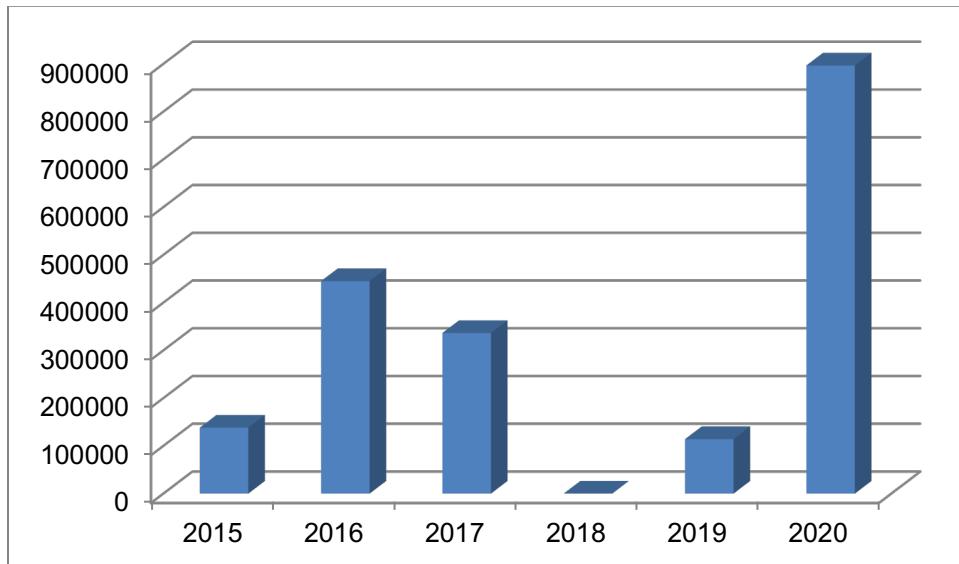

After one retirement in 2020, the Department of Chemistry currently had ten research-active faculty members (Gallo, Junk, Karsili, Knierim, Louka, Massoud, Srivastava, Wang, Xu, Yan). Between 2015 and 2020, the Department of Chemistry produced 137 peer-reviewed publications, most of which appeared in prestigious journals. This amounts to 2.28 publications per research active faculty per year over the past six years. A marked increase in publications was seen after 2018. This is largely due to the fact that relatively recent hires had accumulated enough results to significantly contribute. It should be noted that, in the absence of a graduate program before 2019, virtually all research was accomplished with the participation of undergraduate students.

Peer-reviewed publications by calendar year, 2015 - 2020

External Funding

Members the faculty of the Department of Chemistry received \$1.9 million in external funding between 2015 and 2020. This number reflects shared controlled by chemistry faculty in cases where investigators external to the Department participated. It is noteworthy that a significant percentage of successful proposals resulted from intra- and interdepartmental collaboration, reflecting team effort. The large increase for 2020 reflects two major federal grants secured by Dr. Karsili.

Presentations

Between 2015 and 2020, the faculty of the Department of Chemistry has given 78 presentations, or 1.6 presentations per research active faculty member per year. Many of these presentations were given to international audiences or solicited. The total of five presentations for 2020 is abnormally low due to Covid-19.

Major Program Changes

The Department of Chemistry obtained approval for a Master's program in Industrial Chemistry, to begin in fall 2020, and jointly with the Department of Physics and the School of Geosciences hosts a new Ph.D. program in Earth and Energy Sciences.

Noted Accomplishments

Members of our faculty served as editors or members of the editorial boards of 33 journals. Three of our faculty (Louka, Xu, Massoud) hold Distinguished Professorships. Between 2015 and 2020, the faculty of the Department of Chemistry has received 26 awards and honors.
